EMPLOYMENT

One World Rental, *Full Stack Developer*, Islamabad **Aug. 2024 - Current**

- Co-built instahire.co.uk, a live B2C equipment rental e-commerce platform, with Next.js and Supabase, owning both frontend and backend and integrating IntelliEvent for event management capabilities.
- Built interactive analytics dashboards with real-time data tracking, automating reporting workflows and cutting manual reporting time for stakeholders by an estimated 5+ hours per week.
- Architected and shipped scalable web applications using Next.js, Strapi CMS, and TailwindCSS, owning the full lifecycle from design to production deployment on Microsoft Azure, maintaining high availability and performance.

Freelance, *Full Stack Developer*, Remote **Aug. 2020 - Current**

- Designed and developed 10+ SaaS and web platforms for startups using both the MERN stack (MongoDB, Express, React, Node.js) and Next.js, taking each from client requirements through to a shipped product.
- Built responsive, high-performance websites for businesses serving 500+ customers, maintaining fast load times and consistent cross-device UX.
- Managed the full project lifecycle independently end to end, hosting client applications on AWS (EC2, S3, Lightsail) with full server provisioning and CI/CD deployment pipelines.

CyberxStudio, *Frontend Developer*, Islamabad **Nov. 2023 - Aug. 2024**

- Developed and maintained a secure, high-performance website for Ferrotechnics, working directly with the client to deliver bespoke solutions on schedule.
- Built scalable web applications using Next.js, Strapi, and TailwindCSS, overseeing full-cycle development and seamless CMS integration.
- Converted Figma designs into pixel-perfect, responsive websites, working closely with the SEO team to improve user engagement metrics.

Rezolvat, *Frontend Developer Intern*, Rawalpindi **Oct. 2022 - Jan. 2023**

- Built the ReactJS frontend for RezoQuick, a task marketplace platform, and assisted with the MongoDB, Node.js, and Express backend.
- Helped build a marketplace connecting individuals and businesses with a community of freelancers for task delegation.

Interns Pakistan, *Front-end Developer Intern*, Remote **Feb. 2022 - Mar. 2022**

- Developed a WordPress website using HTML, CSS, PHP, jQuery, and JavaScript during a one-month intensive internship, building foundational web development skills.

UB Enterprises, *Web Developer*, Rawalpindi **Apr. 2021 - June 2021**

- Led end-to-end design and development of the company website, delivering a polished product matching stakeholder expectations.
- Created detailed Figma mockups prior to development, reducing revision cycles through better upfront alignment.
