EMPLOYMENT

One World Rental, *Full Stack Developer*, Islamabad **Aug. 2024 - Current**

- Developed a full B2C e-commerce platform with Next.js, handling both frontend and backend development and integrating IntelliEvent for event management capabilities.
- Built an interactive operations dashboard with real-time data tracking and intelligent alerts, unifying visibility across 50+ country operations and eliminating missed orders that were previously falling through the cracks.
- Architected and shipped scalable web applications using Next.js, Strapi CMS, and TailwindCSS, owning the full lifecycle from design to production deployment on Microsoft Azure.
- Leading Horizon RFID a React Native scanner, on-prem RFID readers, a Next.js dashboard, and a Firebase backend, validating checkout/check-in against the ERP in real time.

CyberxStudio, *Frontend Developer*, Islamabad **Nov. 2023 - Aug. 2024**

- Developed and maintained a secure, high-performance website for Ferrotechnics, collaborating directly with the client to deliver bespoke solutions on schedule.
- Built scalable web applications using Next.js, Strapi, and TailwindCSS, overseeing full-cycle development and seamless CMS integration.
- Converted Figma designs into pixel-perfect responsive websites, boosting user engagement through close collaboration with the SEO team.
- Built a HIPAA-compliant healthcare document management platform in Next.js, implementing AES-256 encryption, role-based access control, and automated audit trails for regulatory compliance.

Freelance, *Full Stack Developer*, Remote **Aug. 2020 - Sept. 2024**

- Designed and developed 20+ SaaS platforms for startups using both MERN and Next.js stacks, contributing directly to client revenue growth.
- Built responsive, high-performance websites for businesses serving 500+ customers, maintaining quick load times and consistent cross-device UX.
- Managed the full project lifecycle independently, from requirements and architecture to deployment on AWS (EC2, S3, Lightsail).

Rezolvat, *Frontend Developer Intern*, Rawalpindi **Oct. 2022 - Jan. 2023**

- Contributed to full-stack development of RezoQuick, a task marketplace platform — built the ReactJS frontend and assisted with MongoDB, Node.js, and Express backend.
- Helped establish a dynamic marketplace enabling individuals and businesses to delegate tasks, supporting a community of skilled freelancers.

Interns Pakistan, *Front-end Developer Intern*, Remote **Feb. 2022 - Mar. 2022**

- Developed a WordPress website using HTML, CSS, PHP, jQuery, and JavaScript during a one-month intensive internship.

UB Enterprises, *Web Developer*, Rawalpindi **Apr. 2021 - June 2021**

- Led end-to-end design and development of the company website, delivering a polished product that matched stakeholder expectations.
- Created detailed Figma mockups prior to development, enabling informed design decisions and reducing revision cycles.
